

# Luke M. Hebert

(504) 616-0302 | lhebert@nd.edu | Marrero, LA

## EDUCATION

### University of Notre Dame, Mendoza College of Business

*Bachelor of Business Administration*

**Notre Dame, IN**

*Aug. 2024 – May 2027*

- Majors: Business Analytics, Finance | Minor: Mathematics
- GPA: 3.43 | Transferred from Saint Joseph's University, GPA: 4.00 (Honors Program)

## EXPERIENCE

### NewEdge Advisors

*Investments & Trading Intern*

**New Orleans, LA**

*June – July 2026*

- Developed quantitative screening framework across three dividend strategies/Blue Chip model portfolios, ranking ~100 securities using internal ratings, dividend yield, profitability, leverage, volatility, and momentum to identify 10 potential trade candidates
- Evaluated six proposed portfolio substitutions, quantifying their effects on dividend yield, sector concentration, valuation, projected income, and turnover to identify a scenario that increased estimated portfolio yield by approximately 20 bps while limiting turnover

### Machine Learning for Corporate Share Repurchases & Equity Selection

*Independent Quantitative Research expanded from ITAO 30220: Predictive Analytics Coursework*

**Notre Dame, IN**

*Feb. 2026 – June 2026*

- Built end-to-end Python data pipeline across 2,585 Russell 3000 constituents, extracting quarterly financial statement and share-count data through a financial-data API to construct 18,274 firm-quarter records across 955 companies and 403 raw variables
- Expanded dataset to 768 variables through financial and market feature engineering, producing 17,319 labeled observations for next-quarter buyback prediction while implementing point-in-time controls to limit look-ahead bias
- Trained L1 logistic regression, random forest, and XGBoost using 60/20/20 train-validation-test design; completed 1,620 XGBoost cross-validation fits and achieved ~0.87 out-of-sample ROC-AUC, 79% accuracy, and 75% F1 with SHAP-based model interpretation
- Conducted 24 quarterly cross-sectional backtests benchmarking against Value, Momentum, and Quality using Fama-French 5-factor + Carhart momentum regressions, transaction costs, turnover, and HAC inference; found buyback predictability did not translate into investment alpha with substitutions underperforming

### Data Club

*Travel Analyst – 84.51°*

**Chicago, IL**

*Jan. – May 2026*

- Selected for a competitive data analytics case team to preprocess, integrate, and feature-engineer 1.5M Kroger transaction, product, and household-level records in Python for large-scale retail analytics
- Built category and household-level analytical features across 303 product categories to quantify purchasing behavior, buyer penetration, visit frequency, basket composition, and demand patterns
- Applied machine learning and statistical modeling techniques, including K-means clustering for household segmentation, Apriori Algorithm for market basket analysis, and multiple linear regression for product-level price elasticity estimation
- Developed an interactive analytics dashboard in Power BI and executive presentation to communicate model-driven insights and strategic recommendations to 84.51° analysts in Chicago office

### Gulf Coast Bank & Trust Company

*Digital Finance Transformation Intern*

**New Orleans, LA**

*June – Aug. 2025*

- Built internal financial dashboards and transaction reporting tools by integrating SQL Server data with PHP, JavaScript, HTML, and Bootstrap Web Framework for use across company departments
- Developed Python and SQL scripts to extract, tokenize, and categorize 7,000+ transactions by department and asset type, enabling more structured financial analysis

### Investment Club

*First-Year Stock Pitch Team Member*

**Notre Dame, IN**

*Sept. 2024 - Present*

- Pitched a buy recommendation of Vital Farms, Inc. (NASDAQ: VITL) with a \$48.53 price target and 44.4% upside in April 2025, supported by DCF, public comps, precedent transactions, and growth-regression analysis
- Participate in weekly meetings to assess long equity positions for a \$1.4M student-managed portfolio linked to University's endowment

## SKILLS & INVOLVEMENT

- **Technical:** Tableau, Power BI, Python (scikit-learn, PyTorch, XGBoost, pandas), R, Java, Excel, AI Prompt Engineering
- **Training:** Wall Street Prep courses in valuations, M&A, LBO modeling, and more (95 hr), Bloomberg Market Concepts
- **Campus Involvement:** Keenan Hall Zaland Pizza Manager, Quant Club, Keenan Revue, Student Union Board, DELTA Club
- **Interests:** machine learning, kayaking, third-wave coffee, urban planning & public transit
